

Calumma Ecological Services is a Kent based ecological consultancy. We offer a range of competitively priced [services](#) that include walkover surveys, preliminary ecological appraisals, great crested newt survey and EPS licence applications, reptile surveys and mitigation, protected species and biodiversity risk assessments and general wildlife surveys including advice on biodiversity and development. We offer free, no obligation quotations and are delighted to discuss all aspects of ecological work with clients before any work is commissioned.

We have considerable experience working in Kent, Sussex, Surrey, Essex and across southeast England and ensure that local experts are used effectively in each project to provide our clients with a professional and quality service.

We are pleased to announce that Dr. Brady is a registered consultant for the newly introduced Great Crested Newt Low Impact Class Licence.
